P.O. Box 128 550 Industrial Road West Brooks, Alberta Canada T1R 1B2

NOTICE OF ANNUAL MEETING

TAKE NOTE that the annual meeting of the irrigators of the Eastern Irrigation District is scheduled to be held on **Tuesday**, **March 7**th, **2023**, **at 1:30** in the afternoon at the Heritage Inn, 1217 – 2nd Street West, Brooks, Alberta.

The Eastern Irrigation District (EID) operates an extensive water supply, storage and drainage network. Water diverted from the Bow River at the Bassano Dam provides water for:

- irrigated agriculture
- household and livestock water uses
- municipal and industrial water requirements
- many recreational needs and enhanced environmental conditions

The EID was organized under Alberta legislation in 1935. The formation of the District made it possible for the irrigators to take over the irrigation project started by the Canadian Pacific Railway Company in the early 1900's. The vision of these early settlers and agricultural entrepreneurs has created a long-lasting and positive legacy for the region.

The EID is governed by a Board of Directors elected from and by the irrigators in the District. The main office of the District is located in the City of Brooks.

In addition to the water management functions of the District, the EID owns and is responsible for the operation and management of large tracts of native and improved pasture lands. These lands are primarily used in support of the beef cattle industry.

The management of water and land resources is conducted with an integrated and sustainable approach. This approach allows the District and these important natural resources to act as a catalyst to support important regional economic development initiatives.

In the truest sense, water is more than agriculture. The Eastern Irrigation District is a place where "WATER WORKS WONDERS"!

2021 Board of Directors

Jason Hale (Chairman: Apr. - Sep.) Division 1 Gem/Bassano

Tracy Hemsing (Chairman: Oct. - Cur.) Division 7 Rolling Hills

Members of the Board of Directors are elected by the irrigators. The Eastern Irrigation District has adopted a practice of staggered elections, in which two directors are elected in one year, two directors are elected the next year and three directors are elected in the following year. This method of elections provides for long-term stability in the governance, administration and operation of the District.

Chairman and Board of Directors' Report

The Board of Directors would like to thank the water users for their support throughout the year. The concerns of the lingering drought were on everyone's mind heading into spring although the winter snowpack was above average setting us up for adequate runoff in the spring. The rain we received in June was a welcome sight, it allowed crops and grass to grow and gave a little reprieve from the extensive dry conditions.

This April, Divisions 2, 4, and 7 Board seats were up for election. Congratulations to David Peltzer, Brian Schmidt, and Tracy Hemsing who were acclaimed to serve on the Board for another three year term.

The Board of Directors continues to keep in mind the Vision and Mission statements as we work with landowners while enhancing our irrigation system through new pipelines and rehabilitation projects to provide opportunities for sustained growth for our water users and surrounding communities. The District is also conducting soil testing on various parcels of District owned land to further investigate the possibility of irrigation expansion on these lands.

Preliminary work continues with the Snake Lake Reservoir expansion project as we prepare to construct this District enhancing reservoir, a multi-generational project that will benefit our District, local communities, and others within the Bow River Basin.

Aquatic invasive species, specifically invasive mussels, remain a major concern for the District and Alberta Irrigation Districts Association (AIDA). We are working collaboratively to stop the spread of these invasive species through education, mandatory watercraft registration, and water monitoring. This summer we continued to see high boat use on our reservoirs. We thank the dedicated staff who tirelessly monitor our reservoirs to keep them free from mussels.

As sections of the Farm Improvement Grant came to a close as of September 30, 2022, the Board of Directors would like to thank the staff involved with administering this grant; it was a very time-consuming process. The Board is very proud of the program and the financial assistance it provided the water users.

The EID continues to work closely with the County of Newell on projects such as the joint Drainage Program and the Kinbrook Connection Pathway. Also, the Board is continuing the \$2,000 grant for eligible water users to assist with connecting to phase 2 of the County of Newell Water Project.

In October, our Chairman, Jason Hale, received the appointment of Deputy Minister of Agriculture and Irrigation for the Province of Alberta. Accepting the appointment meant that he must step down from the EID Board of Directors. Having Jason in this position with the government is a huge asset for our District. The Board of Directors would like to thank Jason for his years of service to the District. The District held a byelection and Richard Hiebert was elected to represent Division 1. We would like to thank Braden Douglass for also stepping forward and showing an interest in the District.

In November, a public meeting was held with water users concerning the renewal of the 31 long term private grazing leases that are expiring at the end of 2023. The request from water users at the meeting was that, if a tender process or auction were to be held, existing leaseholders be given the right to match the highest tender or bid. After extensive discussion at the Board level, it was decided to move forward with an auction by way of a live bid. This honors the direction for the expired leases that were signed in 2008 and gives existing lease holders the opportunity to be high bid in an open format. Information packages for individual leases will be available to outline the terms and associated costs. Moving forward, the length of term will be for 15 years, and these leases will be fully transferrable to any eligible water user in the District.

In January, the Board of Directors voted unanimously to rescind the audio recording policy that was implemented in November of 2021. Removing this policy will facilitate the sharing of ideas and perspectives as well as discussion amongst the Board members at meetings. Administering the audio recording policy has also required more time of EID staff, at times the recordings have been inaudible, and overall, there has been minimal uptake in accessing the posted audio recordings. For water users who are interested in what transpires at Board meetings and are concerned about transparency, a representative from the Brooks Bulletin is still permitted to attend Board meetings and the meeting minutes will continue to be posted on the EID website.

Chairman and Board of Directors' Report

In closing, the Board of Directors would like to thank the EID staff for all their hard work and dedication. This has been another year of change and pressures of conveying water in dry conditions. Your dedication and support have not gone unnoticed.

I would like to encourage all the water users to continue to reach out to Directors with your suggestions,

concerns, and questions. As your Board, we are here to represent water users and do what is in the best interest for you and the District as a whole.

Respectfully submitted, Jason Hale, Past-Chairman, Board of Directors Tracy Hemsing, Chairman, Board of Directors

General Manager's Report

Ivan Friesen, General Manager

A fatal diving incident occurred at the Lake Newell and Rolling Hills structure in October 2022. The Occupational Health and Safety investigation is ongoing and the EID has no additional updates to provide until the investigation has concluded. Our deepest condolences continue to extend out to the family of the deceased.

The start to the 2022 irrigation season was a contrast of prospects. Locally it looked discouraging, with poor soil moisture conditions from the hot dry year prior and little precipitation in the winter and early spring timeframe. This was contrasted with the mountain snowpack generally well above average across the reporting snow pillows, giving optimism of an adequate river flow from the snow melt to meet the anticipated early and significant irrigation demand, while also filling reservoirs from winter to seasonal operating levels. This played out with irrigation delivery operations starting the week of April 25th (approx. 10-14 days earlier than the long-term average) and demand well above average through the May period. The rains starting in June through mid-July changed a potentially challenging irrigation season into a more typical one. Diversion for the year was approximately 478,000 ac-ft (538,000 ac-ft - 2021) which included approximately 10,000 acre-ft put back into total reservoir storage due to the prior year Lake Newell drawdown to accommodate the construction of the Scott pipeline inlet.

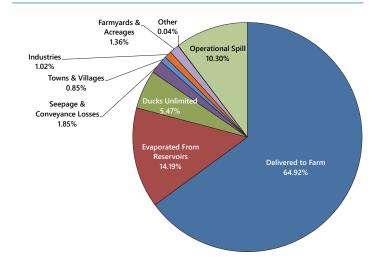

The Alberta Irrigation Modernization (AIM) program is well underway with construction complete on 9 out of 33 projects consisting mainly of open canal to pipeline projects. The AIM program is comprised of the Government of Alberta (GOA) providing 30% in funding, the Districts contributing 20% down and the Canadian Infrastructure Bank (CIB) providing a loan that must be repaid. Snake Lake Reservoir expansion, which is also part of this program, is in the phase of extensive engineering, geotechnical work, and regulatory process. It is anticipated that this phase of work will take 18-24 months to complete.

As with many industries, the irrigation industry has encountered material supply constraints which have created delays and scheduling adjustments. To date, the District has been able to adapt to accommodate delivery of materials, but it has also necessitated the rehabilitation of some projects being delayed a year or more.

Solar projects on District lands continue to move forward. In particular, on-site pre-construction activities are occurring in advance of anticipated construction of the Brooks Solar Farm west of Brooks proceeding in 2023.

Water Balance (acre feet)

	2022	2021			
Diversion	480,400	537,700			
Delivered to Farm	305,200	374,200			
Evaporation from Reservoirs	66,700	75,700			
Ducks Unlimited	25,700	23,200			
Seepage and Conveyance Losses	8,700	8,700			
City, Towns and Villages	4,000	4,200			
Industries	4,800	4,100			
Farmyards and Acreages	6,400	6,400			
Change in Storage	10,300	-17,400			
Other Purposes	200	200			
Operational Spill	48,400	58,400			
Measured Return Flow	67,700	75,500			
Operational Spill	48,400	58,400			
Farm Spill and Run Off	19,300	17,100			

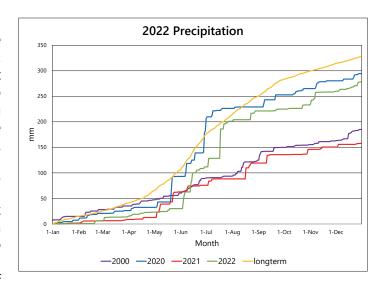

General Manager's Report

Ivan Friesen, General Manager

The Farm Improvement Program saw 183 approved applications totaling \$1,964,259 with portions of the program being concluded September 30th, 2022. The majority of these improvements were for smart control pivot panels, installation of corner arms, pump upgrades, and nozzle packages, then converting to a more efficient method of irrigation, cost-shares for tree removal or drain relocations, and return of deductions.

The grazing season in 2022 was also contrasted. Declining reserve grass from the year prior, poor spring moisture conditions, and the pessimistic outlook for even average grass growth in 2022, resulted in the reduction in the number of cattle placed in the 10 community grazing associations. The maximum listing was reduced from 75 to 70 head with a total of 16,427 head (prior 5 year average of 16,886) placed on community pastures. However, the rains in June and early July throughout the District resulted in drastically improved pasture conditions with very good grass growth, and replenished reserve grass going into the 2023 season. The accumulated snow to date also provides optimism towards next year in refilling water supplies in needed areas. It is projected to increase the maximum listing next year to 75 head per member.

This past year, 27 new wells were established on District owned land, with an additional 37 twinned wells on existing leases, and 39 wells reclaimed. There were 34 miles or 204 acres of

new pipelines. 1 seismic project was requested.

The District would like to thank Chuck Getz, who retired in 2022, for his dedication and years of service.

A sincere appreciation is also extended to the water users, Board of Directors, and staff for the dedication and work necessary in achieving the District's primary directive of conveying water to the farm gate. The commitment and support have resulted in continued enhancements throughout the District.

Acres by Method of Irrigation: 2022

Acres by Method of Irrigation: 2002

Maintenance of Irrigation Works

As of End of 2022 Water Delivery Season

This year saw above average costs when compared to the 5 year average. This increased amount included unexpected maintenance on the Rolling Hills pump station and is reflected in the higher costs in labour and repairs to pump stations. Other increased costs are related to the inflationary pressures on the cost of materials and increasing recovery rates on heavy equipment.

Note: The table below has been revised for the 2022 Annual Report. Previous years' data is not available for the newly added items but will be filled in going forward.

Type of Maintenance				Amo	ount

Irrigation Rehabilitation Report

Ryan Gagley, Engineering Manager

2022 Rehabilitation

In 2022, the EID construction crews installed over 25 km of PVC pipeline, rehabilitated more than 3 km of canal and replaced 10 concrete structures. The big project, Scott Pipeline, saw the District installing a new closed pipeline directly out of Lake Newell Reservoir that serves over 5,000 acres with room for future development in the area.

As is typical for the District, the majority of our projects were designed, managed and constructed by EID staff. Projects completed throughout the 2021/2022 construction season cost a total of \$39,960,000.

The upcoming 2022/2023 capital construction program will consist of two major projects, as well as the continuation of the EID/County Joint Drainage Program. The drainage program will continue in the Rosemary area with crews finishing up Phase 2 and moving onto Phase 3.

Irrigation Rehabilitation Program (IRP)

The IRP program is an Alberta Government sponsored program for irrigation districts located in southern Alberta. It is a cost shared program based on a 75:25 cost sharing agreement. One new pipeline will be installed under this program during the 2022/2023 construction season.

Irrigation Rehabilitation Program (IRP)					
Project	Description	Engineer	Contractor	2022 Project Cost	Total Project Cost
Spring 2022					
Bow Slope Canal	Canal Rehabilitation	EID	EID	\$1,373,800	\$1,387,300
F Tilley Check Structure	Structure Rebuild	Aqua Systems 2000	Aqua Systems 2000	\$268,400	\$ 276,800
Fall 2022					
02 Bow Slope Pipeline	PVC Pipeline	EID	EID	\$1,738,200	
Total:				\$3,380,400	\$1,664,100

Irrigation Rehabilitation Report

EID Capital Construction Program

Funds for this program are provided entirely from the District's Irrigation Works Reserve Fund. The 2022 expenditures amount to approximately \$36,579,600 for the installation of 25 km of pipeline and 3 km of canal rehabilitation. The fall of 2022/spring 2023 will see the construction of approximately 13 km of pipeline and 3 km of canal rehabilitation under this program.

Financial Report

The Eastern Irrigation District operates under the authority of the *Irrigation Districts Act* (c. I-11, RSA 2000). Each year the District appoints an auditor to prepare an audit of the District's financial statements. The audit is prepared in accordance with the form and the reporting standards for not-for-profit organizations as recommended by the Chartered Professional Accountants of Canada.

The auditor reports to the Board of Directors. A copy of the District's financial statements and the auditor's report are subsequently provided to the Irrigation Council as required under the *Irrigation Districts Act*.

To the Members of Eastern Irrigation District

Opinion

We have audited the financial statements of Eastern Irrigation District (the Company), which comprise the statement of financial position as at September 30, 2022, and the statements of revenues and expenditures, changes in net assets and cash flow for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at September 30, 2022, and its results of operations and its cash flow for the year then ended in accordance with Canadian accounting standards for not-for-profit organizations.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with Canadian accounting standards for not-for-profit organizations, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters relating to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Independent Auditor's Report

Independent Auditor's Report to the Members of Eastern Irrigation District (continued)

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements. As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures
 that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
 effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

NOTES TO THE FINANCIAL STATEMENTS

September 30, 2022

1. Purpose of the Organization

The Eastern Irrigation District is charged with the responsibility of efficient and economical distribution of water to users in the District and operates as a not-for-profit organization under the *Alberta Irrigation Districts Act*.

2. Significant Accounting Policies

The financial statements are prepared by management in accordance with Canadian accounting standards for not-for-profit organizations and include the following significant accounting policies:

Fund Accounting

The activities of the District have been disclosed as two distinct funds - the General Fund and the Irrigation Works Fund:

General Fund - Discloses the water management and delivery operations, EIDNet operations and land lease operations of the District, as well as certain special projects as designated by the Board of Directors from time to time. The general fund includes management of equipment and personnel, the costs of which are billed to the irrigation works fund to the extent they relate to construction activities.

Irrigation Works Fund - Discloses receipts and expenditures for new irrigation works and interest earned on such monies. Costs incurred in constructing new irrigation works and in replacing and rehabilitating existing structures are provided for from this fund. The Province of Alberta contributes to the projects in the fund. The Irrigation Rehabilitation Partnership with the Province of Alberta contributes to this fund 75% of the expenditures on projects approved by the Irrigation Council. The Alberta Irrigation Modernization program with the Province of Alberta contributes to this fund 30% of the expenditures on projects approved by the Irrigation Council.

Use of Estimates

The preparation of the financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the year. By their nature, these estimates are subject to measurement uncertainty and the effect on the financial statements of changes in such estimates in future years could be significant. Significant areas requiring use of management estimates relate to the useful lives of assets for amortization purposes, provision for gravel pit closure and post closure costs and the amount of allowance required for uncollectible accounts receivable.

Revenue Recognition

Restricted contributions related to general operations are recognized as revenue of the General Fund in the year in which the related expenses are incurred. All other restricted contributions are recognized as revenue of the appropriate restricted fund.

Unrestricted contributions are recognized as revenue of the General Fund in the year received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

Property and Equipment

Property and equipment are recorded at cost. Amortization of buildings and equipment is provided using the declining balance method (except for grazing pasture reseeding which uses the straight-line method) at rates intended to amortize the cost of these assets over their estimated useful lives. The annual rates are as follows:

Computer and radio equipment	25%
Heavy equipment	25%
Mobile equipment	20%
Agricultural equipment	15%
Buildings	10%
Other equipment	10%
Grazing pasture reseeding	7%
Fibre lines and equipment	4%

Irrigation works assets are recorded at cost to the District. Items capitalized include the cost of easements and rights of way purchased. Irrigation works are amortized on a straight-line basis over their estimated average useful lives of 40 years, except for irrigation works automation projects which are amortized on a straight-line basis over their estimated average useful lives of 5 years.

Work in Progress - Capital additions that are not completed or are not in use are not amortized. The amount is included in Property and Equipment.

Land

Land is recorded at cost to the District. Approximately 574,000 acres of land that were transferred from the Canadian Pacific Railway Company in 1935 are recorded at zero cost.

Income Taxes

The District is exempt from income taxes under section 149(1)(I) of the *Income Tax Act*.

NOTES TO THE FINANCIAL STATEMENTS

September 30, 2022

2. Significant Accounting Policies (continued)

Materials and Supplies

Materials and supplies are carried at the lower of cost and net realizable value with cost being determined on a first-in, first-out basis.

Financial Instruments

The District initially measures its financial assets and liabilities at fair value; it subsequently measures all its financial assets and financial liabilities at amortized cost. The financial assets subsequently measured at amortized cost include cash and short term investments, accounts receivable and prepaids. The financial instruments measured at amortized cost include accounts payable, accrued liabilities and deferred revenue.

Impairment

At the end of each reporting period, the District assesses whether there are any indications that a financial asset measured at amortized cost may be impaired. When there is an indication of impairment, the District determines whether a significant adverse change has occurred during the period in the expected timing or amount of future cash flows from the financial asset. Any impairment to the financial asset is charged to income in the period in which the impairment is determined. When the extent of impairment of a previously written-down asset decreases and the decrease can be related to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed to the extent of the improvement, but not in excess of the impairment loss. The amount of the reversal is recognized in income in the period the reversal occurs.

Cash and Cash Equivalents

Cash and cash equivalents consist of cash on hand, bank balances and member deposits with maturities of less than 90 days.

Unearned Revenue

Annual compensation related to oil and gas well and powerline leases is charged to the lessee at the beginning of each lease year. These monies are recognized as revenue on a straight-line basis over the succeeding twelve months. At year-end, the unamortized portion of such leases is reflected on the Statement of Financial Position as unearned revenue. The outstanding balance from land sale agreements is reflected on the Statement of Financial Position as unearned revenue. Land sale revenue is recognized in the period in which the payment is received.

Pension Plan

The District is a member of the Local Authorities Pension Plan, a multi-employer defined benefit pension plan. This Plan is accounted for by the defined contribution method.

Deferred Grants and Contributions

Grants and contributions from third parties received to finance construction of irrigation works and the EIDNet towers and sector radios are deferred and amortized to income on the same basis as the irrigation works and the EIDNet assets to which they relate. Amortization of deferred grants related to irrigation works is provided on a straight-line basis over a 40 year period. Amortization of deferred grants related to EIDNet assets is provided using the declining balance method (sector radios at 25%; towers at 10%).

Gravel Pit Closure and Post Closure Liability

Pursuant to the Alberta *Environmental Protection and Enhancement Act*, the District is required to fund the closure of its gravel pits and provide for post closure care. Closure and post closure activities include contouring the site, replacing the soil, re-establishing vegetation and submitting the final reclamation report. The accrued liability is based on an estimate of future costs.

Internally Restricted Net Assets

The future use of a portion of the District's net assets has been restricted by the Board of Directors. Monies have been allocated to the following areas:

Irrigation works additions- monies to be used for future irrigation works additions and rehabilitation, including the District's 25% commitment to Province of Alberta Cost Share Projects and the District's share of the Bassano Dam Spillway project.

Community pasture development- monies to be used for future improvements or expansion of community grazing pastures.

Externally Restricted Net Assets

Funds received from the Province of Alberta must be used for specific cost share irrigation projects. These monies and interest earned on their investment are disclosed separately as externally restricted net assets.

NOTES TO THE FINANCIAL STATEMENTS

September 30, 2022

3. Local Authorities Pension Plan

Employees of the District participate in the Local Authorities Pension Plan (LAPP), which is covered by the *Public Sector Pension Plans Act*. The Plan serves about 281,764 people and 435 employers. It is financed by employer and employee contributions and investment earnings of the LAPP fund. Contributions for current service are recorded as expenditures in the year in which they become due. The District is required to make current service contributions to the Plan of 8.45% of pensionable earnings up to the Canada Pension Plan's Maximum Pensionable Earnings and 12.8% for the excess. Total current and past service contributions by the District to the Local Authorities Pension Plan in 2022 were \$602,036 (2021 - \$639,512). Total current and past service contributions by the employees of the District to the Local Authorities Pension Plan in 2022 were \$542,195 (2021 - \$580,529). At December 31, 2021, the Plan disclosed an actuarial surplus of \$11.92 billion (December 31, 2020 - actuarial surplus of \$4.96 billion).

4. Short Term Deposits

Short term deposits in the amount of \$11,102,366 (2021 - \$14,362,693) are maturing in the next 90 days and include GICs, term deposits and notice demand accounts at interest rates varying from 0.7% to 3.34% (2021 - 0.7% to 2.7%). At year end these deposits have an average annual interest rate of 1.83% and will mature within the next 90 days.

5. Accounts Receivable

Accounts receivable consist of:

	2022	2021

Materials and supplies

8. Inventories

\$3,302,117 \$2,881,677

• •

The amount of inventories recognized as an expense during the year was \$762,563 (2021 - \$783,507).

9. Long Term Debt

Long term debt consists of a term loan with Irrigating Alberta Inc. which is repayable in variable annual installments including interest at 1.0%.

Annual payments began in January 2022 and the loan is due in 2056.

The loan is secured by Incremental Revenues earned by the District. Incremental Revenues are generally defined in the loan agreement as revenues earned, as a result of the Alberta Irrigation Modernization program above the baseline revenues for irrigation rates, capital asset and capital construction charges and any other revenues directly attributable to the projects. The net book value of the Incremental Revenues at September 30, 2022 are \$3,753,400.

Current portion of long term debt

The current portion of the long term debt described above is not known as of the date of the financial statements. The Incremental Revenues that will be transferred to the Irrigating Alberta Inc. on January 31, 2023 is \$3,770,900. The current portion of the loan will be paid from those funds.

Five year repayment schedule

The loan repayment schedule is not determinable at the date of the financial statements as the amount of the loan is determined by the Irrigation Works projects that will be completed in the future and the repayments are impacted by the Incremental Revenues collected in the future.

Externally

The Board of Directors has authorized the transfer of \$15,029,323 (2021 - \$17,965,358) from current year operations to internally restricted funds to be used for future irrigation works additions and \$3,150 (2021 - \$1,650) for community pasture development. As well, authorization was given to use \$166,353 from the community pasture reserve to pay for some of the pasture reseeding costs.

11. Irrigation Rates

Irrigation rates consist of:	2022	2021
308,846 acres at \$0 per acre	\$0	\$0
3,110 acres at \$0 per acre terminable	0	0
0 acres subject to annual agreements	0	0
122 acres at \$0 per acre 5R soils	0	0
Minimum parcel rates and adjustments	0	0
	\$0	\$0

The cost to deliver water to the farm gate during the current year was \$28 per acre (2021 - \$24). The Board of Directors approved using other District revenues to pay this cost so that the water rate charged to the irrigators could be set at \$0 per acre (2021 - \$0).

12. Community Grazing Expenses

Community grazing expenses consist of:	2022	2021
Water	\$392,338	\$402,842

End of Year	\$889,234	\$854,674

NOTES TO THE FINANCIAL STATEMENTS

September 30, 2022

18. Related Party Transactions

The members of the District's board of directors are related parties by virtue of their influence. The District entered into transactions with the Directors in the normal course of business and on the same terms as are applicable to transactions with unrelated parties.

These transactions are recorded at their fair value, as follows:

Division	-	2	m	4	72	9	7		
Director's Name	Jason Hale	David Peltzer	Ross Owen	Brian Schmidt	Don Jacobson	Brent Schroeder	Tracy Hemsing	2022 Totals	2021 Totals

NOTES TO THE FINANCIAL STATEMENTS

September 30, 2022

19. Financial Instruments and Risk Management

The District is exposed to the following risks as a result of holding financial instruments.

Currency Risk

The District has limited exposure to currency risk as most all of the District's transactions are denominated in Canadian dollars.

Fair Value

The District's financial instruments consist of cash and short term investments, accounts receivable, prepaids, accounts payable, accrued liabilities and deferred revenue. The fair values of these financial instruments approximate their carrying values due to their relatively short term to maturity.

Interest Rate Risk

The District is exposed to interest rate risk dependent upon the balance of its cash and cash equivalents.

Credit Risk

The District is exposed to credit risk on its cash, fixed income investments and accounts receivable.

Liquidity Risk

Liquidity risk is the risk that the District will not be able to meet its obligations as they become due. The District's approach to managing liquidity risk is to ensure that it always has sufficient cash and credit facilities to meet its operating requirements

20. Commitments

Uncompleted contracts:

The District has commitments in an estimated amount of \$0 (2021 - \$244,710) in respect of uncompleted work under contracts on approved projects.

The District has entered into agreements to sell land which, if all sale conditions are satisfied and the sales are completed as expected, will result in gross sale proceeds of approximately \$146,950 (2021 - \$0).

21. Contingencies

There is still some contamination at the old truck shop location. The cost of remediation, if required, cannot be determined at this time.

The District is a third party defendant and a defendant in a separate, but related, claim for damages and losses for trespass, nuisance, negligence and unauthorized use of land. The likelihood of a gain or loss is not determinable, nor is the amount reasonably estimable.

22. Comparative Amounts

Certain of the comparative amounts presented in these financial statements have been reclassified to conform to the presentation adopted in the current year.

23. Approval of Financial Statements

These financial statements were approved by management and the Board of Directors

2023 Annual Meeting Agenda

Annual General Meeting, Tuesday, March 7, 2023, at 1:30 pm

1.0	Welco	ome and Opening Remarks: Mr. Tracy Hemsing, Chairman, Board of Directors
2.0	Electi	on of a Chair for the Annual General Meeting: Mr. Tracy Hemsing
3.0	Adop	tion of the Agenda
4.0	Appro	oval of the Minutes: March 8, 2022, Annual General Meeting
5.0	Business Arising from the Minutes: March 8, 2022, Annual General Meeting	
6.0	Presentation of Reports	
	6.01	Chairman of the Board of Directors Report: Mr. Tracy Hemsing
	6.02	General Manager's Report: Mr. Ivan Friesen, General Manager
	6.03	Maintenance Report: Mr. Ivan Friesen, General Manager
	6.04	Rehabilitation Report: Mr. Ryan Gagley, Engineering Manager
	6.05	Audited Financial Statements of the District: Ed Chapman, Beyan and Partners

7.0 General Matters and New Business

- 7.01 General Matters Raised from the Floor
- 7.02 Report on Scheduled Elections: Mr. Ivan Friesen, Returning Officer
 - Division 1 (Gem/Bassano): Mr. Richard Hiebert (Term Expired)
 - Division 5 (Scandia/Rainier): Mr. Don Jacobson (Term Expired)

8.0 Adjournment

March 8, 2022, Annual General Meeting

The Eastern Irrigation District held its Annual General Meeting on Tuesday, March 8th, 2022, 1:30 p.m. at the Heritage Inn in Brooks, Alberta. Approximately 110 people were in attendance.

The meeting was called to order by the Chair of the District, Mr. Jason Hale, at 1:30 p.m.

1.0 Welcome and Opening Remarks – Mr. Jason Hale, Chairman, Board of Directors

Mr. Hale welcomed those in attendance at the Annual General Meeting, including Jennifer Nitschelm, Director – Irrigation Secretariat; Mark Miyanaga, Member – Irrigation Council; Margo Jarvis Redelback, Executive Director – AIDA; and County of Newell Councillors.

2.0 Election of a Chair for the Annual General Meeting – Mr. Jason Hale

Mr. Hale called for nominations for Chair of the annual meeting.

Moved by Wayne Slenders that Holly Johnson be nominated for Chair.

As no further nominations were placed, Holly Johnson was elected Chair by acclamation. Ms. Johnson assumed the chair.

3.0 Adoption of the Agenda

Ms. Johnson advised of the format for making comments and asking questions from the floor. A motion to adopt the agenda was requested.

Moved by Wayne Slenders, seconded by Daniel Doerksen, that the agenda be adopted as presented.

Ms. Johnson asked if there were any requests for additions or deletions to the agenda; being none a vote on the motion was requested.

The motion to adopt the agenda was carried.

4.0 Approval of the Minutes – March 9, 2021, Annual General Meeting

Ms. Johnson called for a motion to accept or revise the minutes from the March 9, 2021, Annual General Meeting.

Moved by Wayne Slenders, seconded by John Ketchmark, that the minutes of the 2021 Annual General Meeting be approved as distributed.

Ms. Johnson asked if there were any revisions to the minutes; being none a vote on the motion was requested.

The motion to approve the minutes was carried.

5.0 Business Arising from the Minutes – March 9, 2021, Annual General Meeting

Ms. Johnson called for items of business arising from the minutes of the 2021 Annual General Meeting; none were raised.

6.0 "Economic Value of Alberta's Irrigation Districts" – Ms. Margo Jarvis Redelback, Exec. Director, AIDA

Ms. Jarvis Redelback presented a summary on the Economic Value of Alberta's Irrigation Districts, a report commissioned by the AIDA last year, which focused on the period of 2011 – 2018. A greater impact on the economy than previously demonstrated in the 2015 study, the new report can be found by visiting www.albertairrigation.ca. The presentation is summarized as follows:

Over 40% of the world's food supply is dependent on irrigation.

Annual Report Insert

Minutes From Annual General Meeting, March 08, 2022

- Irrigation is the most reliable prevention for famine.
- Canada has the ability to significantly increase food production to support global population growth.
- Alberta's 13 irrigation districts support 60 different crop varieties and 29 specialty crops on 4.4% of Alberta's cultivated area. Irrigated crop production for various crops can be between 2 and almost 6 times as much as equivalent crops grown on dryland.
- Inputs, operations, maintenance, rehab, and labour of irrigation districts and farm businesses, as well as agricultural product and processing, all influence the economy.
- Water conveyed for community and industrial use, hydropower production, recreation, flood mitigation, and wildlife habitat also contribute to the economy.
- Irrigated crop sales total \$1.076 billion per year, which is 17% of total provincial farm sales.
- Specialty crops generate almost 50% of the total crop sales on 22% of the irrigated land base.
- Livestock production in irrigation districts saw \$2.2 billion per year, which is 38% of Alberta's total average livestock sales and is 2 times more revenue than crop production.
- Combined irrigated crop and livestock production total \$3.3 billion per year, 27% of the total primary agriculture sales in Alberta, \$1.019 Billion to total agri-food GDP, supports 10,786 full time jobs, and generates 8 times more revenue per acre than dryland.
- Irrigation related food processing accounts for \$2.086 billion to provincial GDP, \$1.12 billion in labour income, and 16,128 full time jobs.
- Every \$1.00 invested by the Government of Alberta in irrigation districts generates \$3.56 in added revenue to the GOA.
- Total economic impacts of irrigated agriculture see \$5.4 billion to provincial GDP, \$3.2 billion in labour income, approximately 46,000 full time jobs, and 80% of income-generated benefits accrued to the province and 20% to irrigation producers.
- With the assistance of the Alberta Irrigation Modernization (AIM) program, future opportunities are seen in increased and diversified crop production. Other opportunities will likely be seen in increased intensive livestock production and solar power development.

Ms. Johnson asked if there were any questions of Ms. Jarvis Redelback. Mr. Hale and Ms. Jarvis Redelback responded to questions and comments from the floor.

7.0 Presentation of Reports

7.01 Chairman of the Board of Directors Report – Mr. Jason Hale

Mr. Hale presented the Chairman's Report as summarized below:

- Water users were thanked once again for their patience as the District continued to deal with COVID-19 restrictions.
- Appreciation was given to outgoing Director Bob Chrumka for his years of service and a welcome to new Director Brent Schroeder in Division 6. Ross Owen was acclaimed in Division 3.
- New Vision and Mission Statements were adopted to help set goals and guide decisions. A Board Code of Conduct was also approved. [documents can be found at www.eid.ca]
- Admin and staff prepared extensive information for plebiscite expansion discussion. A plebiscite to increase the expansion limit to 345,000 was passed with 75% of those voting water users, voting in favour. Subsequently, irrigation development applications were approved in April and November.
- The Government of Alberta, Canada Infrastructure Bank, EID, and 9 other irrigation districts together invested an additional \$118 million to modernize irrigation infrastructure. This brings the total investment under this program to just under \$1 billion.

- Aquatic invasive species continue to be a major concern for the District and AIDA. A collaborative
 approach is continued through education, mandatory inspections, and watercraft registration. Thanks
 to staff, a total of 4,166 watercraft were registered in the EID, and 12 high risk watercraft were disallowed
 entry to our reservoirs.
- The EID and County of Newell continue to work together through the County/EID Joint Drainage Program and have this year collaborated on a Soil Erosion/Degradation Advisory Committee.
- Even with increased demands on the system, the District's infrastructure provided certainty for water users during a summer of drought.
- A crucial infrastructure project, the expansion of Snake Lake Reservoir, will benefit the District, local
 communities, and others within the Bow River Basin by supplying additional water storage to help
 alleviate current pressure on the river and the EID system. The District is extremely pleased to have
 entered into a sale agreement for the land required for the project.
- EID staff were thanked for their hard work and dedication, especially during a year of changing restrictions and conveying water in dry conditions.
- Water users were encouraged to continue to reach out to Directors with any questions, concerns, or suggestions.

Ms. Johnson asked for a motion to accept the report.

Moved by John Ketchmark, seconded by Wayne Slenders, that the 2021 Chairman of the Board of Directors Report be accepted as presented.

Ms. Johnson asked if there were any questions of the Chairman; being none she asked for a vote on the motion.

The motion to adopt the report was carried.

7.02 General Manager's Report – Mr. Ivan Friesen, General Manager

Mr. Friesen presented a PowerPoint providing expanded and complimentary information to the General Manager's Report contained in the District's 2021 Annual Report, as summarized below:

- Precipitation in 2021 began well below the long term average, prompting an earlier water delivery date
 of April 25th. Precipitation remained low and comparable to other dry years; however, diversion was
 118,000 ac-ft lower than in 2000 (another extremely dry year).
- 310,000 acres are being irrigated in the EID with consistently less water than was used to irrigate 100,000 acres in 1935. Overall diversion from the Bow River for the WID, EID, and BRID is trending downward, while irrigated acreage increases. In 1987, approx. 1,100,000 ac-ft was diverted as compared to approx. 700,000 ac-ft in 2020; and approx. 525,000 irrigation acres were assessed as compared to approx. 685,000 irrigation acres in 2020.
- Efficiencies of method of irrigation from 2002 to 2021 can be seen in low pressure pivots increasing from 30.4% to 78.22%, wheel moves decreasing from 18.8% to 4.07%, and leveled flood decreasing from 28.5% to 9.48%. High pressure pivot, unleveled flood, and other methods make up the difference.
- Snowpack sites continue to show accumulation and are tracking well above the upper quartile.
- The plebiscite to increase the expansion limit from 311,000 to 345,000 passed with 75% of those voting, voting in favour. The Expansion Limit Change Bylaw allows for the expansion limit to be changed from 311,000 irrigation acres to 345,000 acres. No more than 340,000 irrigation acres may be assessed until the Snake Lake Reservoir expansion project is commissioned, or the Board holds a meeting with the water users and consequently approves to exceed the 340,000 acre limit to 345,000 by a special resolution approved by not less than 6 Directors of the Board.
- Subject to permitted exceptions, the Irrigation Acres Bylaw limits approval of new parcel irrigation acres

- in any given year to 2,000 and for new parcel irrigation acres which are not located downstream of either Lake Newell Reservoir or Crawling Valley Reservoir to 800.
- In spring, 2,000 acres were approved for completion by September 30, 2021. 700 infill acres were also approved throughout the year. In fall, another 2,000 acres were approved for completion by September 30, 2022.
- Through the Alberta Irrigation Modernization (AIM) program, \$282.8 million will be invested for modernization projects and reservoir expansion within the EID. The District contributes 20% upfront, the Province funds 30%, and the CIB contributes 50% through financing arrangements.
- The Snake Lake Reservoir expansion project would move 48,750 downstream irrigation acres under reservoir support and indirectly support 96,000 river acres. Full scale geotechnical drilling commenced March 1, 2022. Regulatory approvals are ongoing. The project has a completion schedule of 2027 – spring 2028.
- Farm Improvement grants have totalled \$10.6 million since 1999 (\$7.4 million in the last 5 years). The
 Board has approved the removal of sections 8.0 (panel, pump, nozzles, and pivot modification upgrades)
 and 9.0 (corner arms and subsurface corners) to take effect September 30, 2022, rendering related
 expenditures incurred after September 30, 2022, ineligible for reimbursement.
- An average of nearly 87,000 AUM or 17,000 head have been placed in Community Grazing pastures
 over the last 7 years. 5 of the last 7 years have experienced lower than average precipitation which can
 limit the grazing season. Additional waterlines and pasture management have enabled cattle listings
 to remain relatively stable.
- 9,245 oil and gas leases and twinned wells have been acquired within the District since 1990. Since 2014, 934 leases have been abandoned and 221 reclamation certificates have been issued.
- A 400-megawatt solar facility is being proposed by Solar Krafte to be sited in part on 3,600 acres of EID
 lands which are heavily impacted by conventional energy production. A revenue stream for the District,
 the facility is also expected to provide significant property tax revenue and direct and indirect economic
 activity in the County and City. The AUC hearing is to be held in March.
- Phase 1 of the 8 phase fibre build for EIDNet has been completed, connecting One Tree, Duchess, and Rosemary towers to the Brooks tower. Phase 2 is scheduled for 2022 to build the Cassils and Bantry reaches, at an estimated project cost of \$1,800,000.
- Water users were encouraged to give their input to Directors regarding the following matters:
 - Should the expansion of irrigation acres be done more quickly or differently? Demand for irrigation
 acres is particularly high in river supported areas and relatively weaker on the reservoir supported
 areas.
 - When should the District develop its own lands for irrigated farm or irrigated grazing leases? When the 1,200 irrigation acre allotment for reservoir supported areas is not fully subscribed, does this allow the District to participate?
 - Should the 15 year long term grazing leases expiring at the end of 2023 be extended to current holders or bid out as per the 2008 agreement? The District plans to have public meetings this fall with a decision made late 2022 early 2023.
 - The District is willing to consider all industries/commercial activities that are looking to locate in the County of Newell to diversify revenue streams, including renewables.
- Sincere appreciation was extended to water users, Directors, and staff for the dedication and work in achieving the District's primary directive of conveying water to the farm gate.
- For details on the General Manager's Report as printed in the District's 2021 Annual Report Book, visit www.eid.ca

Ms. Johnson asked for a motion to accept the report.

Moved by David Slomp, seconded by Allen Nielsen, that the 2021 General Manager's Report be accepted as presented.

Ms. Johnson asked if there were any questions of the General Manager. Mr. Friesen responded to questions and comments from the floor. Ms. Johnson requested a vote on the motion.

The motion to adopt the report was carried.

7.03 Maintenance Report – Mr. Ivan Friesen, General Manager

Mr. Friesen presented the Maintenance of Irrigation Works Report as summarized below:

- Maintenance costs for 2021 totalled \$2,936,357; which is on average over the last 5 years.
- There was an increased amount of drain/canal cleaning and clipping and a reduced amount of mowing and spraying when compared to the average. Both can largely be attributed to hot summer conditions in 2021.

Ms. Johnson asked for a motion to accept the report.

Moved by Gerwin Van Den Hoek, seconded by Kelly Christman, that the 2021 Maintenance Report be accepted as presented.

Ms. Johnson asked if there were any questions of the General Manager; being none she asked for a vote on the motion.

The motion to adopt the report was carried.

7.04 Rehabilitation Report – Mr. Ryan Gagley, Engineering Manager

Mr. Gagley reviewed the 2021 Rehabilitation Report, displayed information on completed projects, and advised of plans for future Capital and IRP projects.

- In 2020/2021, \$29,731,800 of District funds were spent on Capital Construction. 29 km of pipeline were installed on 5 projects, where for almost 5 km the largest diameter PVC pipe available (60"/1500 mm) was installed.
- 2021/2022 capital construction consists of: Scott Pipeline, 13-H West Bantry, 08-B Springhill extension, 09-B Springhill extension, 12 Springhill, as well as the continuance of the County/EID Joint Drainage Program in the Rosemary area.
- IRP projects to be completed in 2021/2022 are: Bow Slope Canal, 15 North Branch check structure, and F Tilley check structure.
- All projects being proposed for 2022/2023 include: Secondary C North Branch, 01 One Tree, 02 Bow Slope, Lake Newell Feeder, West Bantry Phase 3, and County Drainage.

Ms. Johnson asked for a motion to accept the report.

Moved by George Graham, seconded by Tony Brummelhuis, that the 2021 Rehabilitation Report be accepted as presented.

Ms. Johnson asked if there were any questions of the Engineering Manager. Mr. Gagley responded to questions and comments from the floor. Ms. Johnson requested a vote on the motion.

The motion to adopt the report was carried.

7.05 Audited Financial Statements of the District – Mr. Justin Latrace, MNP

Mr. Latrace, MNP, presented the independent auditor's report and the audited financial statements,

highlighting the following:

Assets

Current Assets

- Cash/STI/CI increased by approx. \$34 M. There was a larger than usual increase as interest rates were cut during the pandemic. Since a better rate of return was received on the chequing account versus investing in any term deposits, numerous GICs and term deposits were not renewed. Additionally, it is expected to see an increase in cash given the additional financing being funded by the federal and provincial government for the Alberta Irrigation Modernization (AIM) program. Under the AIM program, the GOA covers 30% of the costs and the Canada Infrastructure Bank provides financing for 50% of the costs associated with our modernization projects and the Snake Lake Reservoir expansion.
- Accounts receivable increased by approx. \$2.7 M. This is primarily due to a receivable under the AIM program of \$2.87 M. The remainder of the changes are normal fluctuations that occur from year to year.
- Inventory and prepaid expenses saw minor increases, which are normal fluctuations that occur from year to year.

Non-Current Assets

- The total decreased by approx. \$20 M, which is largely due to the decrease in long term investments.
 Long term investments are normally more consistent as GICs are renewed with longer than one year to maturity; however, given the poor interest rates, the EID paused the long term GIC investments.
- The remaining fluctuations in deposits, non-current AR, and trust funds are minor and within normal expectations.

· Property and Equipment

- There was a net increase of \$12.4 M (refer to Note 7 of the Financial Statements).
- Total Irrigation Works (IW) projects capitalized were \$29.7 M. An increase in activity on projects was seen compared to the previous year due to the increase in funding under the AIM program.
- There were no land purchases during the year. A few land sales occurred, totalling 34 acres.

Liabilities

- Accounts payable is up \$1.4 M. This is expected with the increase in IW activity during the year.
- Unearned revenue (current and non-current) increased by \$1 M, which is mostly caused by an increase in unearned oil and gas revenue.
- Long term debt is a loan associated with the AIM program. The EID will be taking a loan for 50% of the IW projects that qualify for the AIM program.
- In regard to deferred grants and contributions, the EID received \$10.1 M in grant revenue this year which will be amortized into revenue as the funds are spent. In 2021, \$7.1 M was amortized into revenue.

Fund Balances

- Fund balances are used to track how funds have been spent and allocated/earmarked for future spending on EID projects and initiatives (refer to Note 10).
- The internally restricted pasture development fund had \$1,650 allocated to it to bring the ending balance to \$167,254.
- The Internally Restricted Fund for future Irrigation Works started the year with a balance of \$80.2 M.

As the District did receive an IRP grant in 2021, the District was required to contribute to the Externally Restricted Fund – Province of Alberta in the amount of \$964,000. \$3.6 M were withdrawn to pay for building purchases and capital projects funded solely by the District. \$4.4 M were added to the fund from capital asset charges, gravel royalties & dirt sales, the gain on the sale of land, and from interest earnings. The Board of Directors transferred \$17.96 M into the fund from current year's operations. Over the year, the fund balance increased by about \$17.8 M.

- The Bassano Dam project added \$583 in interest income to bring the ending balance to \$936,403.
- The externally restricted Province of Alberta Fund started with a positive balance of \$7.2 M; \$10.1 M in grant funds were received and allocated to the account. \$26.2 M in irrigation works additions were made in cost share with the province of Alberta which brings the ending balance to a deficit of \$7.8 M.

Statement of Operations

- Total water earnings were up by nearly \$30,000. This number is driven by oil and gas drilling which was consistent with last year. This number is expected to go up as oil and gas drilling seems to be increasing in fiscal 2022.
- Lease Revenues
 - Total oil and gas/powerline revenues were very consistent with the previous year. The aggregate
 decrease of 64,000 was expected as oil and gas was very consistent with 2020; however, revenues
 are expected to increase somewhat in fiscal 2022.
 - Community Pasture lease revenue increased \$114,000 while irrigated leases also increased \$98,000.
 - These increases were offset by decreases in private grazing leases of \$10,000 and other lease revenues are down \$21,000.
- Investment income is down \$469,000 which was expected as a full year of low interest rates was experienced.
- The gain on the disposal of land, equipment, and buildings consisted of approx. 34 acres in land sold during the year and the disposal of trucks and various other capital items.
- Capital asset charges are up by \$1.9 M which is a product of the AIM program.
- Net gravel sales in 2021 were \$164,000 compared to \$418,000 in 2020.
- Amortization of irrigation works is up as well due to the increase in irrigation works assets being greater than amortization reported in the previous year.
- Total operating and administrative costs were \$14.5 M compared to \$13.5 M in 2020 (refer to Schedule 1).
 Of the \$14.5 M of incurred costs in 2021, \$6.3 M were recovered from or charged to capital construction projects leaving net 2021 operating costs of approx. \$8.2 M, which is only \$18,000 less than last year.
- Community grazing expenses were up \$124,000 which is primarily due to the increase in water expenses (pumping costs and maintenance) in 2021, caused by the hot, dry summer.
- Special projects to highlight (refer to Note 14):
 - Campground expenses were up \$226,000 due to a full year of the campgrounds being open in fiscal 2021, compared to a partial year due to covid in 2020. Campground revenue is also up \$107,000 for the same reason.
 - Farm Improvement grant expenses decreased by approx. \$254,000.
 - Other special projects are listed in Note 14.
- EIDNet net income was \$291,000, which is up \$111,000 compared to last year (refer to Note 15). Income is up due to the increase in subscription revenues while operating costs remained consistent with the previous year.
- Overall, the surplus for the year is \$12.1 M.

Ms. Johnson asked for a motion to accept the report.

Moved by Tim Doerksen, seconded by Tony Brummelhuis, that the 2021 Independent Auditor's Report and Financial Statements be accepted as presented.

Ms. Johnson asked if there were any questions of Mr. Latrace; being none she asked for a vote on the motion.

The motion to adopt the report was carried.

8.0 General Matters & New Business

8.01 Integrated EID Website – Mr. Mark Porter, Information Services Supervisor

Mr. Porter advised that technical advancements have enabled the integration of the IRMA App and the newly revised www.eid.ca website.

- The Irrigation Recording and Management App (IRMA) was developed to record and review real time irrigator water orders, water usage by parcel, canal/pipeline flow rates, reservoir levels, and river diversion rates, as well as recording crop details and irrigation method. Water users can obtain an account to see details specific to their parcels such as water orders, water use, current flow rates, assessed acres, supply pipeline or canal, and Water Operator area.
- The District's new website www.eid.ca will be fully accessible on mobile devices, containing updated information and a quick link to IRMA mapping. Secure login accounts will provide access to online permits, applications, and IRMA data.

Ms. Johnson asked if there were any questions of Mr. Porter; none were raised.

8.02 General Matters Raised from the Floor

Ms. Johnson asked if there were any questions from the floor.

Directors and the General Manager responded to various questions from the floor regarding algae control, water storage, a suggestion to bring back a water rate, Board review of engineering projects, development of the vision and mission statements, proposed multi-purpose dams west of Calgary, irrigation development, declining oil and gas revenue, renewable energy, and IRP funding.

8.03 Report on Scheduled Elections – Mr. Ivan Friesen, Returning Officer

Mr. Friesen reported that the term of the members of the Board of Directors for Electoral Division 2 Rosemary/ Duchess, Electoral Division 4 Cassils/Brooks, and Electoral Division 7 Rolling Hills has been completed, and therefore nominations are being accepted for these divisions. The nomination period will close Wednesday, March 9, 2022, at 5:00 p.m. Nomination forms can be obtained from the District Office. An election, if necessary, will be held Tuesday, April 12th.

8.02 General Matters Raised from the Floor cont'd

Ms. Johnson asked if there were any further questions from the floor. A general matter raised earlier from the floor was given further discussion.

9.0 Adjournment

There being no further questions and no new business arising, Ms. Johnson called for a motion to adjourn the meeting.

Moved by Wayne Slenders that the annual meeting be adjourned at 4:01 p.m.
